Projects

Music Project

This is a project that a few classmates of mine have made. It allowed you to look up your favorite artist, add them to a favorites list and read up all about them.

Movie Project (Spoiled Potatoes)

Spoiled Potatoes is a website where you can search for your top 5 movies, add them to a list, read up on the movie, write a review and even create an account. All of this is done through the power of CSS3, HTML5, JS and Node.js. (https://spoiled--potatoes.herokuapp.com/)

My Own Portfolio Website

This website was created to be simple but yet catch the eye of the visitor. It was inspired by the New York Times style and its simplicity. (https://dylanguidrysportfolio.netlify.app/)

Education

06/2021 - 09/2021

Digitalcrafts – Software Development

Full-Stack Dev Bootcamp learning multiple languages and skills.
